

CHECKS AND BALANCES STOP MISTAKES.

Good people and good software both slip up. Build in a second set of eyes, so one mistake never turns into a breach.

\$3B

lost to business email compromise in 2025: fake invoices and "please update our bank info" emails.

A quick call to a number you already know can stop it cold.

FBI Internet Crime Report 2025

NO SINGLE POINT OF FAILURE

PEOPLE CHECK PEOPLE

- ✓ **An admin leaves a test user enabled.** A second admin reviews the work and turns it off.
- ✓ **Call to verify** any bank-detail change, using a number you already know.

TECHNOLOGY CHECKS TECHNOLOGY

- ✓ **Automated patching** flags any computer that missed an update.
- ✓ **24/7 monitoring** (EDR/MDR) catches what the firewall and antivirus miss.

PEOPLE CHECK TECHNOLOGY

- ✓ **Real experts review alerts** so nothing a tool flags gets ignored.
- ✓ **Test your backups** with real restores, and confirm patches actually installed.

TECHNOLOGY CHECKS PEOPLE

- ✓ **An employee clicks a bad email link.** DNS security blocks the dangerous site.
- ✓ **A password ends up on a sticky note.** MFA blocks the hacker's login attempt.
