MANAGED IT · AUSTIN & HOUSTON

THREATS DON'T SLEEP. NEITHER DO WE.

Antivirus alone can't keep up with today's attacks. BCS pairs EDR and MDR with a 24/7 Security Operations Center (SOC) to spot and stop threats around the clock.

247
DAYS

The average time it takes to find and contain a breach.
Around-the-clock monitoring is built to catch attackers early, before they spread.
IBM Cost of a Data Breach Report 2026

THREE LAYERS, ONE TEAM WATCHING

EDR
Endpoint Detection & Response

Software on every computer that watches for suspicious **behavior**, not just known viruses, and can isolate an infected device.

MDR
Managed Detection & Response

Security experts tune your EDR, **investigate every alert**, and take action for you, so nothing gets ignored.

SOC
Security Operations Center

A team of analysts watching **24/7/365**: nights, weekends and holidays, when attackers like to strike.

WHAT IT MEANS FOR YOUR BUSINESS

- ✓ **Ransomware stopped early.** Suspicious activity is contained before it spreads across your network.
- ✓ **Covered after hours.** Your business is protected while you sleep.
- ✓ **Real people, not just software.** Analysts confirm threats and filter out false alarms.
- ✓ **Insurance-ready.** Many cyber insurance applications now ask whether you use EDR.
