

ONE LOGIN. LOCKED DOWN.

Stolen passwords are still one of the easiest ways in. Identity security gives every employee one strong sign-in, protected by MFA and managed from one place.

99.2%

MFA reduced the risk of account compromise by more than 99%.

Even for accounts whose password had already leaked, MFA cut the risk by 98.6%.

Microsoft research, "How effective is multifactor authentication at deterring cyberattacks?"

THREE PIECES, ONE SECURE FRONT DOOR

IDENTITY

Identity & Access Management

- ✓ **One account per person**, with access that matches their role.
- ✓ **Add or remove employees** in one place.

SSO

Single Sign-On

- ✓ **One secure login** for Microsoft 365 and your business apps.
- ✓ **Fewer passwords** to reuse or write down.

MFA

Multi-Factor Authentication

- ✓ **A second proof**: an app prompt, security key or passkey.
- ✓ **A stolen password alone** won't get anyone in.

REAL-LIFE SAVES

THE MISTAKE

A password ends up on a sticky note, and someone snaps a photo.

THE SAVE

MFA blocks the hacker's login attempt.

THE MISTAKE

An employee leaves on bad terms with access to a dozen apps.

THE SAVE

One click turns off their access everywhere.
