

STOP THREATS AT THE FRONT DOOR.

A next-generation firewall does much more than block ports. It inspects traffic, stops known attacks, scans for malware and blocks risky countries, all before anything reaches your network.

31%

of breaches began with an exploited vulnerability, the #1 way attackers get in.

Intrusion prevention blocks known attacks while systems wait for patches.

Verizon Data Breach Investigations Report 2026

FOUR LAYERS IN ONE BOX

NEXT-GEN FIREWALL

Smarter than port blocking

Controls traffic by **application and user**, and inspects encrypted traffic where threats like to hide.

IPS

Intrusion Prevention System

Recognizes and **blocks known attack patterns** in real time, shielding systems that aren't patched yet.

GATEWAY ANTI-VIRUS

Scanning at the edge

Checks **downloads and attachments** for malware before they ever reach a computer.

GEO-FILTERING

Country-based blocking

Blocks traffic from **countries you don't do business with**, shrinking your attack surface.

WE INSTALL & MANAGE

FortiGate
SonicWall

A firewall is only as good as its setup. We handle **installation, configuration, firmware updates, security subscriptions and ongoing monitoring**, so your firewall keeps protecting you long after day one.

FREE CYBERSECURITY ASSESSMENT

Is your firewall up to date and fully licensed? We'll check.
