

# CLOSE THE HOLES BEFORE ATTACKERS FIND THEM.

Every missing update is an open door. Attackers now use AI to exploit known flaws within hours, so "we'll patch it next month" isn't good enough.

**31%**

of breaches began with an exploited flaw, the #1 way in.

Verizon Data Breach Investigations Report 2026

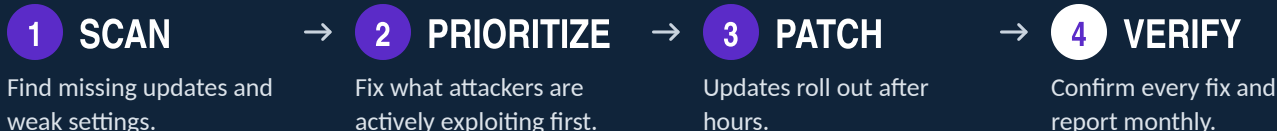

**43 days**

median time for businesses to patch, up from 32 last year.

**26%**

of known exploited vulnerabilities were fully fixed, down from 38%.

## HOW BCS KEEPS YOU PATCHED

## WHAT WE COVER

### WINDOWS & MAC UPDATES

Operating system patches, tested and scheduled automatically.

### THIRD-PARTY APPS

Browsers, Adobe, Zoom, Java and other favorite attacker targets.

### VULNERABILITY SCANNING

Regular scans across computers, servers and network gear.

### END-OF-LIFE ALERTS

Flags systems that no longer get security updates, so you can plan ahead.

**FREE CYBERSECURITY ASSESSMENT**

Find out how many unpatched devices are on your network.

**(512) 257-1433**
