

HACK YOURSELF BEFORE THEY DO.

A penetration test is a safe, authorized attack on your business by ethical hackers. We find the weak spots and show you exactly how to fix them, before a real attacker finds them.

\$11.5M

is the average cost of a data breach in the U.S.

A pen test costs a fraction of that and shows where to focus.

WHAT WE TEST

EXTERNAL NETWORK

Your firewall, VPN, email and website: everything the internet can see.

INTERNAL NETWORK

How far an attacker could get after one employee clicks a bad link.

WIRELESS

Weak Wi-Fi passwords and guest networks that reach business systems.

SOCIAL ENGINEERING

Simulated phishing emails and phone calls to test your team.

HOW IT WORKS

1 PLAN

Scope and rules agreed in writing.

→ 2 TEST

Ethical hackers safely try to break in.

→ 3 REPORT

Plain-English findings, ranked by risk.

→ 4 FIX

BCS closes the gaps and retests.
