MANAGED IT · AUSTIN & HOUSTON

CONNECT THE DOTS. STOP THE ATTACK.

Your firewall, email, computers and cloud apps each see one piece of an attack. SIEM puts the pieces together, and SOAR responds automatically, so threats get stopped instead of missed.

2 mo. FASTER

$2M SAVED

Organizations that made heavy use of security AI and automation contained breaches about two months faster and paid about $2 million less.

IBM Cost of a Data Breach Report 2026

HOW IT WORKS

1 **COLLECT**
Logs from firewalls, servers, PCs and Microsoft 365

→ 2 **CORRELATE**
SIEM links related events into one clear picture

→ 3 **ALERT**
Real threats flagged, noise filtered out

→ 4 **RESPOND**
SOAR playbooks act in seconds, 24/7

SIEM
Security Information & Event Management

- ✓ **Collects every log** in one place.
- ✓ **Spots patterns** no single tool can see, like a strange sign-in followed by a large download.
- ✓ **Keeps a history** for investigations, audits and cyber insurance.

SOAR
Security Orchestration, Automation & Response

- ✓ **Runs playbooks automatically:** lock the account, isolate the device, block the attacker.
- ✓ **Hands analysts the full story**, so real threats get handled fast and false alarms don't waste time.
- ✓ **Responds the same way every time**, day or night.
