

MAKE SECURITY EVERYONE'S JOB.

Firewalls stop a lot. People stop the rest. A strong cybersecurity culture starts at the top and gives your whole team the same language.

87% FEWER CLICKS

Training works. Consistent security awareness training turns your biggest risk into your first line of defense.

KnowBe4 Phishing by Industry Benchmarking Report 2026

6 STEPS TO A CYBER-SMART TEAM

- 1 Leadership goes first.** Invest in training, take it yourself, and talk about it. Your team follows your lead.
- 2 Train everyone, all year.** Short, regular lessons so every employee understands the basics.
- 3 Practice with phishing tests.** Safe, simulated scams build the instinct to pause before clicking.
- 4 Make reporting easy and blame-free.** Thank people who speak up. Fast reports stop small problems.
- 5 Build safe daily habits.** Multi-factor login, a password manager, and a phone call to verify any payment request.
- 6 Keep it visible.** Cover it at onboarding and staff meetings, and celebrate every scam caught.
