SENTINELONE + 24/7 MDR

STOP RANSOMWARE. UNDO THE DAMAGE.

BCS pairs SentinelOne's AI-powered endpoint protection with 24/7 Managed Detection & Response (MDR), so every threat is stopped by software and checked by a human.

48%

of confirmed breaches involved ransomware.

SentinelOne watches behavior, so it catches new threats, not just known ones.

Verizon Data Breach Investigations Report 2026

WHY SENTINELONE

AI ON EVERY DEVICE

Behavioral AI stops threats before they run, even new ones, online or offline.

ONE-CLICK ROLLBACK

If ransomware encrypts files, we can restore the device to its pre-attack state.

STORYLINE

Links every step of an attack into one timeline, so investigations take minutes, not days.

ONE LIGHTWEIGHT AGENT

Protects Windows, Mac, Linux and servers from a single console.

WHAT MDR LOOKS LIKE AT 2 A.M.

24/7 SOC analysts investigate every alert and respond for you

2:03 AM Ransomware launches on a laptop.

→ **2:03 AM** SentinelOne stops it and isolates the device.

→ **2:15 AM** A SOC analyst confirms and cleans up.

→ **8:00 AM** Files rolled back. Business as usual.

FREE CYBERSECURITY ASSESSMENT

See what your current antivirus might be missing.
