

MOST BREACHES START WITH ONE CLICK.

Attackers rarely break in. They trick an employee, log in with a stolen password, or walk through a door nobody patched.

62%

of breaches involve a person: a click, a password, a mistake.

Verizon DBIR 2026

#1

Phishing is the top way attackers get in, four years running.

IBM Cost of a Data Breach 2026

88%

of small-business breaches involved ransomware.

Verizon DBIR 2025

43

days, the median time it takes to patch a known hole.

HOW BCS CLOSES THE GAPS

Multi-factor login everywhere. A stolen password alone won't get them in.

Phishing training & email security. Staff who spot the scam, filters that stop most of it.

Managed patching. Known holes closed in days, not months.

24/7 monitoring & response. EDR/MDR that catches threats while you sleep.
